

Pivot Table & Charts

Assignment

Dataset Link: [Sales Dataset](#)

Dataset Overview

This dataset represents **fruit sales across different regions** within the first 6 months of 2024.

Columns Explanation:

- **Date** → Transaction date (Jan–Jun 2024).
- **Region** → Sales region (East, West, North, South).
- **Product** → Type of fruit sold (Apples, Oranges, Bananas, Mangoes).
- **Sales** → Total sales amount (₹).
- **Quantity** → Units sold.

Tools for Analysis:

- **Excel** → PivotTables, Conditional Formatting, Charts, Dashboards.

Assignment Questions

Easy Level

1. What is the purpose of a PivotTable in Excel?
2. Create a PivotTable to show **Total Sales by Region**.
3. Apply **Conditional Formatting** to highlight sales greater than 400.

Medium Level

4. Explain the difference between **Sorting and Filtering** with an example from this dataset.
5. Create a **PivotChart** showing **Monthly Sales Trend**.
6. Use a **Slicer** to filter data by **Product** and observe changes in sales.

Hard Level

7. Why are **Dashboards important** for decision-making in business analysis?
8. Create a **Dashboard** that includes:
 - Sales by Region (PivotTable + Chart)
 - Product Filter (Slicer)
 - Monthly Trend (Line Chart)
9. Group dates in the PivotTable into **Months** and calculate the **average sales per month**.
10. Combine **Apples** and **Oranges** into one group called **Fruits** and compare its sales with other products.
